

# 1 PS5-Question 3 & 4

## 1.1 Web Scraping

Tell me about some data.

**Solution:**

- This dataset is scraped from Wikipedia and contains the vote share results from the Kenyan presidential elections for the years 2013 to 2022. I used Grant McDermott's Lecture Notes as a guide to scrape the data.
- Sports betting platforms - Xbet (including promotion codes, bets, sports, etc.).

## 1.2 Web Scraping with API

- This dataset is scraped from the English Premier League website, which hosts an API containing information on all Premier League players.
- I used the Jsonlite R package to scrape the data.
